- Publications Acknowledgement : Researchers should acknowledge in publications the names and roles of those who made significant contribution to research , including writers, funders, sponsors, and others, but do not meet authorship criteria. .
- Peer review : researchers should provide fair , prompt and rigorous evaluations and respect confidentiality when reviewing others work.
- Conflict of interest : researchers should disclose financial and other conflicts of interest that could compromise the trustworthiness of their work in research proposals, publications and public communication as well as in all review activities
- Responding to Irresponsible ResearchPractices: Research institutions, as well as journals, professional organizations and agencies that have commitments to research, should have procedures for responding to allegations of misconduct and other irresponsible research practices and for protecting those who report such behavior in good faith. When misconduct or other irresponsible research practice is confirmed, appropriate actions should be taken promptly, including correcting the research record
- Research Environments: Research institutions should create and sustain environments that encourage integrity through education, clear policies, and reasonable standards for advancement, while fostering work environments that support research integrity.
- Societal Considerations: Researchers and research institutions should recognize that they have an ethical obligation to weigh societal benefits against risks inherent in their work
