Establishment of Pharmacovigilance System

Our institution has established a Pharmacovigilance Committee to monitor and report Adverse Drug Reactions (ADRs). A designated Pharmacovigilance Officer oversees the system, ensuring effective implementation.

ADR Reporting

- Well-defined process for reporting ADRs to the National Pharmacovigilance Programme
- Regular training and guidance for healthcare professionals on ADR reporting, focusing on ASU Drugs

Signal Detection and Analysis

- Pharmacovigilance system includes signal detection and analysis to identify potential safety issues
- Thorough investigation and reporting of signals to regulatory authorities

Risk Management

- Risk management system in place to minimize harm from adverse reactions
- Regular review and updates ensure plan effectiveness

Patient Education

- Patients educated on safe medication use and ADR reporting
- Patient information and counseling sessions provided

Collaboration and Communication

- Collaboration with regulatory authorities, healthcare professionals, and patients
- Regular communication and feedback mechanism between physicians and patients

Continuous Monitoring

- Pharmacovigilance system continuously monitored
- Regular monitoring and assessments ensure compliance with regulatory requirements

Guidance and Capacity Building

- Regular guidance for healthcare professionals and patients on ADRs of ASU Drugs
- Capacity-building programs ensure expertise in Pharmacovigilance practices

By achieving these goals, our institution demonstrates its commitment to ensuring drug safety and effective Pharmacovigilance practices.
